

Environmental Geography

By H.M. Saxena

Rawat Publications, 2017. Soft cover. Condition: New. 3rd Edition. Contents: Preface. 1. Introduction: environment, ecology and geography. 2. Man-environment relationship in geography. 3. The nature of ecosystem. 4. Biomes: world ecosystem types. 5. Human impact on the natural environment. 6. Degradation of environment. 7. Air pollution. 8. Water pollution. 9. Noise pollution, land pollution and pollution by radioactivity. 10. Environmental hazards and disasters. 11. Population and ecological crisis. 12. Conservation of natural resources. 13. Management of environment: approaches and issues. 14. Environmental impact assessment and eco-auditing. 15. Biodiversity. 16. Climate change. 17. Sustainable development. 18. Towards sustainability. 19. Governance and geo-politics of the environment. 20. Global environmental issues. 21. Environmental problems and planning in India. 22. Environmental ethics and legislation in India. Glossary. Bibliography. Index. The whole fabric of a geographical study is based on man-environment relationship. Environmental degradation is intimately associated with the intensifying human impact on his surroundings. Right from the beginning, geographers have not only discussed the various components of an ecosystem and their impact on man but also examined the environmental problems, both global and regional, as well as the question of sustainable development. The present book is an interdisciplinary analysis of the natural and anthropogenic components...

Reviews

I actually began reading this article pdf. It really is filled with wisdom and knowledge You wont sense monotony at at any time of the time (that's what catalogues are for concerning should you request me).

-- Ena Klein MD

It is fantastic and great. It is writter in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book i have got read through during my individual life and might be he finest publication for ever.

-- Prof. Murl Shanahan DDS

Environment geography deals with the environment in its totality unlike some other disciplines which only focus on one or few of its aspects. It analyses the time-space relationship between man and the environment. Concept of Environment geography has 3 facets: Environment, Man & Relationship. Environment or the physical entity. It includes the interface of air, water and land forming life supporting layer known as the biosphere. Continue Reading. Environmental geography examines the connections between human and physical geographies at all spatial scales. I have... Welcome to EnviroGeo on Facebook! Although this page is new, it is tied to a blog I have been writing for over a decade, with over 1,000 posts about environmental geography as I see it. Before that, I added hundreds of pages to my faculty web site, again bearing the same name. Integrated geography (also referred to as integrative geography, environmental geography or human-environment geography) is the branch of geography that describes and explains the spatial aspects of interactions between human individuals or societies and their natural environment, these interactions being called coupled human-environment system. Summed up, environmental geography is about humans and nature and how we affect the environment and our planet. Environmental geography gives you the tools to develop sustainable solutions to environmental problems. For example, you will learn about the effect of climate change on biodiversity, the impact of humans on environmental resources and much more. Study abroad.
