 - 17.2.1 Step 1: Acquisition Procedures
 - 17.2.2 Step 2: Classification and Cataloguing Procedures
 - 17.2.3 Step 3: Library Services
- 17.3 Tips for Improving Library Value
- 17.4 Apply What You Have Learnt

Learning Objectives

After going through Unit 17, it is expected that you would be able to

- ❖ Understand library skills and techniques for building library collections for access and retrieval
- ❖ Discuss the services offered in a library and the procedures for rendering them
- ❖ Implement library techniques in your own adult education set-up for building and managing a small library collection and offering services.

17.1 Introduction

Like any other library in academic set-up or research institutions, resources in adult education libraries have also to be planned, developed, and organized for access and retrieval. Besides, such libraries need to offer library and information services such as instructions in the use of library catalogue and reading materials, reference service, information dissemination, etc. Unit 17 describes the procedures for building library resources and rendering library services and explains the procedures for

library management. It discusses the techniques for classification and cataloguing of books and other reading material for information access and retrieval. In addition, it describes the services that a library in an adult education set up needs to offer its clientele.

Let us now begin with a discussion on building library resources and services for adult learners. On the basis of your experience, you may also add some inputs to this in Unit 17.

17.2 Building Library Resources and Services

The libraries in adult education set ups are, by design, small budget libraries, confined to one room space, and adult education staff manages them manually on part time basis. Keeping this in view, library procedures described in Unit 17 are basically quite simple and elementary in nature. Such members of adult educators who do not have any formal education and training in library and information science would find it easy and simple to learn library skills and apply them for building library collections and rendering library services. They can take the following step-by-step approach.

Step 1: Acquisition Procedures

Step 2: Classification and Cataloguing Procedures

Step 3: Library Services

17.2.1 Step 1: Acquisition Procedures

Library acquisition is about procedures for selection of published material for library acquisition, procedures for placing orders for purchase books and other reading material, their accessioning as well as of material received as gratis. It also about procedures for payment of bills, and about upkeep and maintenance of records as required for the purpose.

Procedure for Book Selection: The first step in book selection operations is to invite recommendations from users for purchase of new books and other reading material. For this, the library could take initiative by inviting books on approval from booksellers, or give users publisher catalogues for selection, or send them to visit book exhibitions. Based on this exercise, a tentative listing of useful books is compiled. The second step is to get the compiled list

of books approved by the Library Advisory Committee. The Committee might approve it in total or shortlist it as per their judgment. While finalizing books and other reading materials for purchase, the Committee should pay special attention to the usefulness of the selected material, currency of information given in the books, their cost and availability of funds. The book selection exercise should be undertaken on regular basis through out the year, and not towards the end of the financial year once, just to exhaust book budget.

Procedure for Book Purchase: The second step in book acquisitions is to initiate action for placing orders with the approved vendors or booksellers for selected books. In this regard, the Library needs to obtain first the financial sanction of the competent authority in the organization. It could be either head of the organization, or its deputy or any other designated person for the purpose. For operational performance, it will be useful if the In-Charge Library is given financial authority to sanction expenditure, say, up to Rs.5000/- only in respect of such books and other reading material as recommended by the Library Advisory Committee. The library should by default purchase only latest edition of a book, unless desired otherwise specifically. Sometimes cheap editions of foreign books are printed. In such cases, it is advisable to go for cheaper editions only. However, if one of the roles of the library is to archive books for future, in such a case the library should purchase books printed on good quality paper.

The Library may draw up a panel of vendors/ booksellers as per following criteria. It may purchase books from

booksellers on the panel.

- ❖ Bookseller must have membership of the Delhi State Booksellers Association/ Federation of Indian Publishers/
- ❖ Bookseller must have experience in the line for at least two years
- ❖ Must have PAN Number from the Income Tax
- ❖ The panel may be reviewed every year for performance on the parameters of relevance, quality and comprehensiveness of the books displayed for approval or on the parameter of efficiency and effectiveness with which the bookseller supplied books against order.

The next step is to place formal orders with approved for purchase of books. There is no need for inviting quotations since as per financial rules of the

Government of India books are not store items. Purchase orders can be placed on the catalogue price of the book. As per standard practice, booksellers offer discount on the catalogue price of books, ranging from 10 to 15 percent. Books priced in foreign currencies are to be paid in Rupee currency. The foreign currency conversion is done as per bank's TT selling rate as prevalent on the day of the supply of books. Information about bank conversion rate can be had from newspapers such as *The Economic Times*, and *The Financial Times*. The booksellers are required to supply books along the bill in triplicate. One copy of bill is to be returned to the bookseller duly signed as a token of receipt of books supplied. The library should insist on price proof of the book and bank conversion rate from the booksellers before accepting the supply of books.

Activity 17.1

List steps for acquiring reading material for library.

Accession of Books: Libraries need to maintain records of the books acquired in accession register. This register constitutes a permanent record of the library. Figure 17.1 shows a sample outline of columns of an accession registers. Printed accession registers are also available in the market. Before accessioning, the library needs to physically check the books supplied against order in terms of latest edition, year of publication, and price.

The next step in book acquisition is accession of books by making record

entries in the accession register, wherein each book is assigned an accession number. This number is reproduced later on several different pages in the book accessioned such as (i) back of the title page - bottom portion, (ii) secret page in a book. (This is a discrete page in a book which invariably carries its accession number. The secret page number is known only to the library staff and hence it is known as a secret page), and (iii) on the last page of the book; and on all the copies of the bill/cash memo.

Date	Accession Number	Author	Title	Ed	Place & Publisher	Year of Publication	Vol	Pages	Cost	Vendor	Bill No and Date	Remarks
------	------------------	--------	-------	----	-------------------	---------------------	-----	-------	------	--------	------------------	---------

Figure 17.1 A Sample Outline of Columns of Accession Register

Printed accession registers are available in multiple of 1000 entries per register with a minimum of 5000 entries. Accession register starts from accession number 1 and goes up to 5000. Additional accession register, if required, should begin in continuation of the last accession number in the previous register. Avoid overwriting and cuttings of any kind in the Accession register. The competent authority in the Library must affix a certificate in the beginning pages of the Accession Register certifying that “This register contains ... (so many) pages in which accession

number run from ... to”

While making entry in the Accession register it is advisable to use ink of lasting quality so that its color doesn't fade away with the passage of time. The Accession register is a valuable document and must be kept under lock and key when not in use.

After accessioning, books stamped bearing the name of the library. Book tag, book plate, book card pockets and due date slip are to be pasted at the appropriate places in the book as decided upon by the library.

Activity 17.2

What precautions would you take in accession of books?

17.2.2 Step 2: Classification and Cataloguing Procedures

Each accessioned book is classified, for assigning it a unique (numeric or alphanumeric) call number, and catalogued to facilitate its access and retrieval from the card catalogue by author, title, subject, and call number. The call number of the book is reproduced on the back of the title page, book plate, and on the book card. The book card records necessary information about the book such as its accession number, author, and title. After verifying all these details, the book is released for circulation.

Classification: One of the major management tasks of the librarian is to organize the reading material for

browsing, searching and retrieval by subject and language. The job of classifier involves giving each book in the library a unique numeric or alphanumeric number called ‘Call Number’ – as per library parlance. This number defines placement/ shelving position of the book in the stacks. The other objective of call number is to bring books on the same subject together for browsing and retrieval. According to Ranganathan (1959) a classified arrangement should be such that the library staff is able to:

- 1 Locate a book demanded by a reader immediately even if the library has miles of shelves of books.
- 2 Replace the book at its correct place on the shelf.

- 3 Find out a proper place for a newly purchased book among other books on the same subject.
- 4 Find a place for a new book on a new subject among the already existing books on related subjects

Choice of the Scheme of Classification:

Quite a few schemes of classification have been in use in libraries. These include Colon Classification, Dewey Decimal Classification, Universal Decimal Classification, and Library of Classification, etc. Some of the small libraries design and develop their local scheme of classification. Applying an established and widely used scheme of classification is always better than designing and developing a local one. This gives the library the benefit of continuity in experience in classifying documents and to build thereby the foundation for the future.

Most libraries use Dewey Decimal Classification (DDC). It is now running into 22nd edition. This speaks volumes about its popularity amongst libraries throughout the world. One of the advantages of using DDC is that it can be adapted to the needs of any large or small library. Its abridged editions are designed to meet the special requirements of small libraries. A copy of schedule of 100 classes is given as Appendix A. This schedule alone may not be found adequate to represent all the facets of a subject. Therefore, the use of the Standard Subdivisions of 1000 classes (Appendix B) at times may be found necessary to separate a book from other books having the same ultimate class. These standard subdivisions are not in themselves class number and hence can't be used in isolation, but may be suffixed/and added to any number from the schedule.

Activity 17.3

Why do need to classify books? Why can't we arrange books by accession number?

Cataloguing: A library catalogue is a vital link between the reader and the book. It serves as the key to ascertain the availability of wanted book in a library and its physical location in the stacks. Conventionally, cataloguing of books in libraries is done by using standard cataloguing codes such as Anglo-American Cataloguing Rules (AACR), Classified Cataloguing Code. According to these cataloguing codes, the levels of cataloguing differ from library to library. For example, a major library may apply for highest level of

cataloguing, in which information that goes into the cataloguing entry is very extensive and detailed. However, a small library set up – like the one in adult education organizations – could consider going in for lowest level of cataloguing, in which the elements that go into the cataloguing entry are minimal to ensure access and retrieval of a book by author, title, and subject. A sample catalogue entry using AACR2 code is given below for illustration. This entry is made on a model on 5"x3" cataloguing card (see Box 17.1).

Box 17.1 Cataloguing Card

Class No.

Book No Main Access Point

Title Proper / First statement of responsibility, if different from main entry heading in form or number or if there is no main entry heading. - Edition statement. - Material (for type of publication) specific details. - First publisher, date of publication. - Extent of item. - Note(s). - Standard number

Tracing Section.

Main Entry and Added Entry Cards:

The cataloguing can be done by using cataloguing software or manually. If a library plans to go in for manual cataloguing, cataloguing entries are to be made on 5"x3" card catalogues. For every book, main entry as per sample given above is made. Additional entries are made in case the book has more than one author. Additional entries are also made for access by title and subject. For making added entry cards, main entry card is made in duplicate, and search element such as second author, title, or subject heading is imposed on the top of each duplicated card. For example, if there are two authors then there would one added entry card for the second author, the first author has already been given access point in the main entry card.

Catalogues are of different types such as author catalogue, title catalogue, or subject catalogue. Each catalogue type has catalogue entry cards arranged alphabetically (letter-by letter or word-by-word). These different types of catalogue entries can also be merged together and filed in a single sequence. Such a catalogue is known as dictionary catalogue. For convenience in searching information from the cataloguing tray, for every bunch of 100 cards, guide cards is inserted. Appropriate starting letters in the alphabetical sequence are inscribed on the guide cards. The

cataloguing tray can hold 1000-1500 catalogue cards. Sample catalogue entries for one book are given in the Appendix C for illustration.

17.2.3 Step 3: Library services

The services offered by libraries can be grouped as conventional library services and the services for promoting library use.

- i) Conventional Library Services
 - a) Library Rules
 - b) Circulation: Issue & Return of Books
 - c) Inter-Library Loan Service
- ii) Service Promoting Library Use
 - a) Initiation/Orientation Service
 - b) Reference Service
 - c) Current Awareness Service
 - d) New Books Display
 - e) Thematic Display
 - f) Press Clipping Service

Let us first discuss conventional library rules and then deal with service promoting library use.

i) Conventional Library Services

a) Library Rules: Every library frames a set of rules for regulating its services to members. Rules are framed keeping in mind the library objectives and members interests. As far as possible rules should be explicit, free from any ambiguity. The basic issues addressed in framing library rules are the following:

- 1 Who can use the library?

- 2 Opening and closing hours of the library
- 2 How many books can a member borrow at a time?
- 3 For how long can the member retain borrowed books?
- 4 Conditions of loan, find for the late return of books, loss or damage of books during the loaned period
- 5 Reservation of books
- 6 Recall of issued books
- 7 Renewal of loans
- 8 Suspension of membership privileges
- 9 Personal books/property counter, etc.

b) Circulation: Issue & Return of Books: Circulation means issuing books to valid members on loan, and canceling loans them from issue records upon return of books by members. It is one of the most important activities of a library from users' perspective. For managing circulation, the library needs a proper circulation system designed and developed for the effective control of circulation operations in terms of time per transactions, manpower deployment requirement, and accuracy in record keeping. The manual systems currently in use are: 'Newark' system, 'Browne' system, 'Passbook' system. Of all these systems, Browne system of issue and return is most popular for its efficiency in time per transaction. It is therefore important that a library in the adult education set up may apply Browne system for managing its circulation operations.

Browne System: In Browne system, the members are given Reader's Ticket(s) to enable them to borrow books from the library. The design of the reader ticket is such that it has a pouch on its front side. The pouch is used to hold Book card when a book is issued to a member. For every library book, a Book

card is made. It is kept inside the 'Book Pocket' provided in the book. While issuing a book the Circulation-in-Charge simply removes the Book Card from the Book Pocket and inserts it in the Reader's Ticket pouch, puts in due date stamp on the date slip provided in the book. The 'Book Card' coupled with the 'Reader's Ticket' is arranged behind date guides in the charging tray. This is the simplest of all the methods for issue and return of books. It reduces paper work in managing circulation transactions to the bare minimum. At the time of receiving books from the borrowers, Book card is separated from the Reader's Ticket and it is inserted back in the Book Pocket of the book received. At the close of the day, the issue record is got rearranged and filed behind Due Date guides. For books not received by due date, it is a good practice to send reminders to the borrowers for returning the overdue books. Secondly, the library may consider giving grace period to members before issuing such reminders.

Late Fine: Though it may be unfair to impose fines for the late return of borrowed books, yet it is essential in a library to enforce discipline amongst members. This is done mainly as a deterrent since the amount collected as fine is always very trivial. Formal receipt is, however, issued after realizing late fee money from defaulters in cash. As far as possible, a library in an adult education set up may not resort to this system unless it is warranted by circumstances.

Conscience Box: An alternative to fine system for late return of books is Conscience Box. This concept was designed and developed by Dr S R Ranganathan (1959). In this method no formal receipt is issued to the borrower,

You can use the following devices to promote the use of library by adult members of a community.

S M DHAWAN

instead money as overdue charges is dropped in the Conscience Box. The key to this Box always remains with the authority in the organization. The Conscience Box is opened at a

convenient time in the presence of several officials. The distinct advantage of this method is that it saves time and develops in members a feeling of civic sense and responsibility.

Activity 17.4

Why is Browne System of Issue and Return used most in libraries?

Reservation of Books: Books in heavy demand usually remain in circulation. Members in the waiting list could reserve such books so that they could get the priority in borrowing them upon their receipt in the library. The library informs the member in the waiting list about the availability of the reserved book.

Loss of Books: Books reported as lost by borrowers are required to be dealt as per library rules. Usually, the borrower is advised to replace the book with a new copy. If, however, the book is out of stock in the market, he may be asked to pay the current price of the book after getting it verified from the Publisher's catalogue or from trade bibliographies. The price may also be got ascertained from the Accession Register and formal receipt issued to the borrower. Necessary postings may be done in the Accession Register indicating in the Remarks Column about the "Lost and cost realized vide receipt no... dated...."

c) Inter-Library Loan Service: Every library has a liaison with other libraries in the vicinity. In case of urgent requirements, the resource of such nearby libraries could be harnessed for borrowing books on inter-library loan, or get a photocopy made of the wanted material. The library in the adult education set up could consider building such type of cooperative networks for the purpose.

ii) Service Promoting Library Use

You can use the following devices to promote the use of library by adult members of a community.

Initiation/Orientation Service: For most of users, a visit to the library is the first encounter with the world of books. The users have to be made aware of the privileges they are entitled to as also the rules they are to follow to derive full benefits from the library. There are certain 'do's and don'ts which need to be explained to users at the time of their first formal visit to the library. This information is given to new members upon registration during initiation/orientation service. This service is also important for inculcating reading habits in neo-literates.

Reference Service: Reference service is a reactive service given to members on demand. In an adult education set up, the emphasis in reference service should be on giving knowledge and not just information or documents.

Current Awareness Service: For promoting library services, the library needs to offer proactive services such as current awareness service, selective dissemination of information service, etc. Section 6.5 of Unit 6 has covered detailed information in this regard.

New Books Display & Thematic Display: All the books added into the library stock must be put on display for

a limited period so as to bring them to the notice of all library users. On special occasions, such as birth day of an important author or leader, festivals, sport events, relevant books may be separated from the general sequence and put on a display to bring them to the notice of users.

Press Clipping Service: Newspapers are the most important sources of latest information. It would be most appropriate if the relevant cuttings of write-ups, editorials letters, statements, news items, events etc. are organized in some logical order for future reference and use.

17.4 Tips for Improving Library Value

The following useful tips may help you improve library value at your adult learning setup.

- 1 The library collection must be kept relevant (*i.e.* it must be need based, and irrelevant material if any must be weeded out), current (*i.e.* it must offer latest and novel information), accessible (*i.e.* it must provide tools for such as catalogues, databases for access to information), and available (*i.e.* document wanted by users must be available on the shelf and success rate of the library in this regard should be at least 80 per cent).
- 2 Organize customized information services and give information to users in the form that they can understand and use. For example, audio-visual media is most suitable form of information delivery to adult community lacking in literacy.
- 3 Customized information services include information repacking (such as rehashing technical information for non-technical audience), information condensation (such as preparing abstracts, digests, summaries of useful documents for information dissemination), and information consolidation (such as state-of-the-art information giving an overview of the trends in the literature)
- 4 Customized information services should aim at disseminating information for adding and updating knowledge of individuals, increasing their awareness on issues of interest to them
- 5 Use customized information services as a tool to enable the library to play its role as knowledge gatekeeper on topics of interest to the organization and its clientele
- 6 Make library as a place for social interactions by organizing discussions on issues of topical importance
- 7 Follow the best practices in library management, operations and services
- 8 Library operations and services must kept be efficient and library response time must not exceed users expectations
- 9 Increase the library penetration by enlarging its users base
- 10 Develop a special collection of books and publications frequently in use
- 11 Keep the library circulation current so that books do not remain with the borrower for more than a prescribed period of loan
- 12 Books not in circulation or not in use must be removed from the shelves and be considered actively for weeding them out

- 13 Organize library collections in classified sequence to facilitate information browsing, searching and retrieval by subject
- 14 Publish bibliographies on hot topics of interest to users
- 15 Undertake user survey of library services on periodical basis to ensure that library services are focused and effective
- 16 Keep the library ambience pleasant and inviting
- 17 Develop networking with other libraries for sharing resources
- 18 Ensure regular training of library staff on library skills and procedures
- 19 For collections exceeding 10,000 volumes, the library must consider using any library management system for library automation.

17.5 Apply What You Have Learnt

Suppose you are responsible for improving the library services to the adult community that your adult learning setup covers. Write a note of about 800 words about the various steps you would undertake to promote the library and its services for the adult community.

Appendix A: Copy of Dewey Decimal Schedule of 100 classes Second Summary* The Hundred divisions

000 Generalities

- 010 Bibliography
- 020 Library & information sciences
- 030 General encyclopedic works
- 040 [Unassigned]
- 050 General serial publications
- 060 General organizations & museum science
- 070 News media, journalism & publishing
- 080 General collections
- 090 Manuscripts & rare books

100 Philosophy & psychology

- 110 Metaphysics
- 120 Epistemology, causation & humankind
- 130 Parapsychology & occultism
- 140 Specific philosophical schools
- 150 Psychology
- 160 Logic
- 170 Ethics
- 180 Ancient, medieval & eastern philosophy
- 190 Modern western philosophy

200 Religion

- 210 Philosophy & theory of religion
- 220 Bible
- 230 Christianity & Christian theology
- 240 Christian moral & devotional theology
- 250 Christian orders & local church
- 260 Social & ecclesiastical theology
- 270 History of Christianity & Christian church
- 280 Christian denominations & sects
- 290 Other religions

300 Social Sciences

- 310 Collections of general statistics
- 320 Political science
- 330 Economics
- 340 Law
- 350 Public administration & military science
- 360 Social problems & services; associations
- 370 Education
- 380 Commerce, communications & transportation
- 390 Customs, etiquette & folklore

400 Language

- 410 Linguistics
- 420 English & Old English
- 430 Germanic languages; German
- 440 Romance languages; French
- 450 Italian, Romanian & related languages
- 460 Spanish & Portuguese languages
- 470 Italic languages; Latin
- 480 Hellenic languages; classical Greek
- 490 Other languages

500 Natural science & mathematics

- 510 Mathematics
- 520 Astronomy & allied sciences
- 530 Physics
- 540 Chemistry & allied sciences
- 550 Earth sciences
- 560 Paleontology; paleozoology
- 570 Life sciences; biology
- 580 Plants (Botany)
- 590 Animals (Zoology)

600 Technology

- 610 Medicine & health
- 620 Engineering & allied operations
- 630 Agriculture & related technologies
- 640 Home & family management
- 650 Management & auxiliary services
- 660 Chemical engineering
- 670 Manufacturing
- 680 Manufacture for specific uses
- 690 Buildings

700 The arts; fine & decorative arts

- 710 Civic & landscape art
- 720 Architecture
- 730 Plastic arts; sculpture
- 740 Drawing & decorative arts
- 750 Painting & paintings
- 760 Graphic arts; printmaking & prints
- 770 Photography, photographs & computer art
- 780 Music
- 790 Recreational & performing arts

* Consult schedule for complete and exact heading

800 Literature & rhetoric

- 810 American literature in English
- 820 English & Old English literatures
- 830 Literatures of Germanic languages
- 840 Literatures of Romance languages
- 850 Italian, Romanian & related literatures
- 860 Spanish & Portuguese literatures
- 870 Italic literatures; Latin literature
- 880 Hellenic literatures; classical Greek
- 890 Literatures of other languages

900 History & geography

- 910 Geography & travel
- 920 Biography, genealogy & insignia
- 930 History of ancient world to ca. 499
- 940 History of Europe
- 950 History of Asia; Far East
- 960 History of Africa
- 970 History of North America
- 980 History of South America
- 990 History of other areas

Library Resources & Technical Services (LRTS) is a peer-reviewed journal that takes a critical approach to the questions and challenges facing librarians and libraries with regard to: Collections. Scholarly communication. Preservation (including digitization). Acquisitions (including licensing and economic aspects of acquisitions). Continuing resources. Cataloging (including descriptive metadata, authority control, subject analysis, and classification). LRTS publishes both research papers and thoughtful explorations of operational issues that have value and implications for other libraries. In addition, LRTS publishes editorials, book reviews, letters to the editor, and the annual report of the president of the Association for ... Additional Resources. Public libraries can be differentiated from academic, school, and special libraries because they function to serve the needs of a diverse service population including small children, students, professionals, and the elderly. In contrast, academic libraries serve college and university faculty and students; school libraries serve elementary, middle, and high school students and faculty; and special libraries (such as Presidential Libraries) serve scholars and experts within narrowly defined fields. The following steps can be used to determine the library's general building attributes. The steps below do not assess exterior space needs such as parking and site amenities, which vary widely depending on site selection as determined in the library program. Library Services. Your gateway to a wide range of online information resources. Library Home. Library Resources. Covid-19 (Coronavirus) Notice of Building Closure and Service Changes. You are here. Home. Finding information on your subject. Library Resources. Site Accessibility: Library Services. Library Resources. Home Library Resources. Find articles, journals, ebooks & more. Search. Black History Month. Resources highlighting Black history and Black authors, artists, politicians, inventors and more selected by the University's BME network and the Friends of BME. Resources here also include books, articles and other items on anti-racist activism. Selected resources for your study. Library Helpdesk. Chat to a Librarian - Available 24/7. Building Libraries & Library Additions: General Information. A selection of tools, resources, and advice to help you manage your library building project, whether large or small, suggested by the American Library Association. Centre for Accessible Environments. An information provider and a forum for collaborative dialogue between providers and users on how the built environment can best be made or modified to achieve inclusion by design. Services. buildingSMART Data Dictionary. BIM Maturity Assessment. VORTEX Complex Building Construction in openBIM. Miguel Bermudez, Andreas Wecker, Guillaume Schobinger. Construction.
